

# DWA\_04.3 Knowledge Check\_DWA4

---

1. Select three rules from the Airbnb Style Guide that you find **useful** and explain why.

1. Keep Names Consistent: Use the same names for things to avoid confusion and make it easier to understand your code.
  2. Write simple explanations for each part of my code. It helps others understand and fix it easily.
  3. Break code into small pieces that I can use again. It will make it easier for me to manage and adapt.
- 

2. Select three rules from the Airbnb Style Guide that you find **confusing** and explain why.

1. Using array spreads to copy arrays: This says to use ... to copy arrays, but I'm not sure why.
  2. Using object destructuring for multiple return values, not array destructuring: This rule means to use curly braces {} instead of brackets [] when getting multiple values back from a function. I'm not sure why this matters.
  3. Spacing properly in generator function signatures: This rule says to make sure there's space in the right places when writing generator functions. I'm not sure why this is important.
